Daily Diary Report by Bid Item

Inspector Name Feather, Bernard Job Name: 04-0120F4 Diary #: 657 Date: 02-Sep-2014

testing tomorrow night, Wendesday, 09-03-14, allowing for 24 hour monitoring of the 6" hydrostatic test, due to thermal contraction/expansion.

The FWS crew, including Josh Johnson and Tim Esquivel went on shift at Pier 7 at 2000 on September 2, 2014, then mobilized to the bridge, establishing themselves in the closure of the #1 lane of the WB bridge at 2045. The crew spent approximately 2 hours performing CCO 367 work, shifting the PS-3 base plates to the north on top of the PS-5 cross beams to resolve the conflict between the 6" CCSF Recleaimed Water Main and the cable rail posts.

Following this, the crew spent the rest of the shift preparing the line for testing. Per an agreement between ABF, FWS, and The Department, preliminary testing of the pipe is extra work because this work was previously performed, but the piping leaked due to interferences with the cable rail post. Testing is item work.

The crew completed their work at 0200 on September 3, 2014, and left the bridge at 0215, going off shift at Pier 7 at 0300. Per the pipefitters union agreement, the crew gets 8 hours of pay for 7 hours of work and a 12% hourly pay differential.

The crew used three crew trucks, and the welding machine as a generator in performance of this work.

Ken Chan performed the overnight inspection for CT. His diary is as follows:

Crew started at around 8:45pm, the work was to realign the 6" pipe at pp 75, 81 and perform a preliminary test on the pressure. Crew was off the bridge by 2:15am. (Inspector - Rob Feather)

FW Spencer crew and equipment -Tom Colombo, Tim Esquivel, Cheese Biagi and Josh Johnson; 3 pickup trucks, 1 water truck, 1 light plant, 1 portable potty and tools.
